Uncle Sam's Gold Pile Just Now is Biggest the World Has Ever Seen

There is more gold in the United States than in any other country in the world. The latest Treasury figures show that on August 2 there was \$2,066,399,529 in gold cash and bullion, the greatest stock of gold of any country in the world, probably greater than any other two countries in the world.

The supply of gold in the United States is the greatest in her history, and she is still accumulating it at the rate of \$1,200,000 a month, which was the amount added to the stock of gold in July or between July 1 and August 2.

No nation in the world, ancient or

modern, ever had such a stock of the precious metal. England today has, it is estimated, \$800,000,000. She has been hoarding the metal and urging the people to use paper money. The increase in the stock of gold in the United States is attributed to the accretions from the balance of trade which is now so largely in favor of the United States. In 1907, when the United States had about \$1,612,000,000 in gold, Great Britain had about \$564,000,000. The other leading nations held gold as follows:

Germany, \$1,044,000,000; Russia, \$307,000,000; France, \$506,000,000; Austria, \$303,000,000; Italy, \$258,000,000.

NEGRO WITH KNIFE HALTS WHITE WOMEN

Misses Mary Jones and Elsie Miller Scream, Frightening Man Away in Dark.

Miss Mary Jones, of E street southeast, and her guest, Miss Elsie Miller of Mount Ranier, Md., narrowly escaped serious injury early yesterday morning when a negro approached them at New Jersey avenue and E street southeast and drawing a knife, commanded them to halt. The two young women screamed for aid and frightened the negro away.

The place is a lonely spot at night, but few people passing. Along one side of the street a park extends for some distance. The negro evidently hid behind a tree in the park, as the young women did not see him approach.

They were crossing New Jersey avenue and her guest, Miss Elsie Miller, before them, and drawing a knife from his pocket, banded it and ordered them to halt. Miss Jones and Miss Miller shouted their loudest, and the negro took to his heels down E street. Although a workable description was given of him by the young women, no arrests had been made yesterday by police in connection with the case.

The teetotaler explained that he absorbed the one bottle of beer which stands between him and a 100 per cent prohibition score under pressure of thirst in the Great American Desert.

Ulrich was born on a farm at what is now Times Square, New York City.

WANTS MORE OPEN CARS.

Utilities Body Makes Suggestion to W. R. and E. Company.

That inconveniences arising from passengers standing between seats of open cars should be eliminated, the Public Utilities Commission yesterday suggested that the Washington Railway and Electric Company place as many open cars in operation as there are closed coaches.

The commission notified the company two years ago that the substitution of five open cars for eight closed cars would reduce the standing room in open cars to such an extent that the capacity of the five had as great a capacity as the eight.

In its letter to the company yesterday, the commission points out that while open cars have much greater seating capacity than the closed cars, these reduced the standing room in open cars to such an extent that the capacity of the five had as great a capacity as the eight.
